

## Herbal actives for functional cosmetics

*..... Created by Nature, Refined by Science*

We are proud to unveil our very own line of **Exclusive Herbal extracts for Cosmetics, Skin Care, Hair Care, Body Care and Beauty Care Products**. Our speciality is in the unique expertise in identifying and transforming natural raw materials with their active principles unaltered.

These high quality herbal extracts are made from herbs that are ethically wild harvested or selectively collected. They are **Pesticide-Free** and have never been fumigated or irradiated. They are also **Free of GMOs** (genetically modified organisms).

Each herb is custom picked with sensitivity to the environment at the peak of its growth cycle by skilled botanists.

Most professional herbalists and Cosmetics manufacturers prefer **Liquid Herbal Extracts** because they **tend to be Fresher and more Potent**. Herbs that are dried and then manufactured into extract can lose potency and effectiveness.

Our broad-spectrum liquid herbal extracts are the most potent and **effective way to ingest Herbal Actives into Formulations** and are superior to so-called "standardized" extracts which often use toxic industrial solvents and exclude many of herb's chemical compounds which are erroneously considered inert.

Raw materials are mainly of botanical origin: exotic plants, fruits and traditional medicinal plants.

Active fractions are extracted and purified to achieve a variety of cosmetic benefits for skin care and hair care.

**This brochure presents overview of our product line for skin care, Hair care, Body care and other cosmetic application with main cosmetic claims.**

	Conditioning	Anti-oxidant	Moisturising	Toning (Astringent)	Stimulating	Anti Inflammation	Anti Wrinkle	Anti Ageing	Skin Lightening	Healing or Growth	Anti Dandruff
